Housing project development in Ghana is rising up fast. Residentia wants to be the best accommodation for all public and private staff that qualifies to buy the property.

A low monthly fee applied makes this housing project one of a kind. Plan and design with extreme attention. Residentia makes standalone houses with the most impressive environment.

Spring Wall specializes in the design and construction of prefabricated walls and retaining wall systems

With expertise in both engineering and aesthetics, we create durable and efficient solutions for various applications. Whether it's residential, commercial, or infrastructural projects, our team ensures high-quality workmanship and timely delivery

Our company specializes in customized high-quality interior design and furniture production. With a keen eye for aesthetics and functionality, we create bespoke designs that transform spaces into unique and inviting environments.

From concept to execution, our team ensures that every piece of furniture and every design element reflects our commitment to excellence.

Wave will provide innovative solutions within the energy sector, with a strong focus on sustainability and energy efficiency. Through cutting-edge technologies, strategic partnerships, and forward-thinking approaches, we contribute to a greener and more sustainable future. Whether it is renewable energy, smart grid solutions, or energy-efficient practices, we are committed to making a positive impact on our planet.

Grenco addresses the the need for sustainable food production in Ghana, minimizing environmental impact while ensuring sufficient supply for the population.

Collaboration among stakeholders, including farmers, policy makers, and researchers is essential for successful implementation. By adopting these practices, we aid communities achieve sustainable food production while minimizing environmental impact.

The “Health Care Project Africa” has the sole purpose of being able to reach and guarantee medical assistance in all those areas where, due to high costs, it would be challenging building hospitals.

Gen Holding thinks that, with this project, we will bring health services to all those areas of the country less developed with less funds available.

Construction of 16 buildings for hostel students, in the heart of the most iconic university of Ashanti region, KNUST.

Through this development project, Gen Holding wants to project the students into a new vision of hostel, creating not only more comfortable and luxurious rooms, but also spaces for online study and recreational areas.

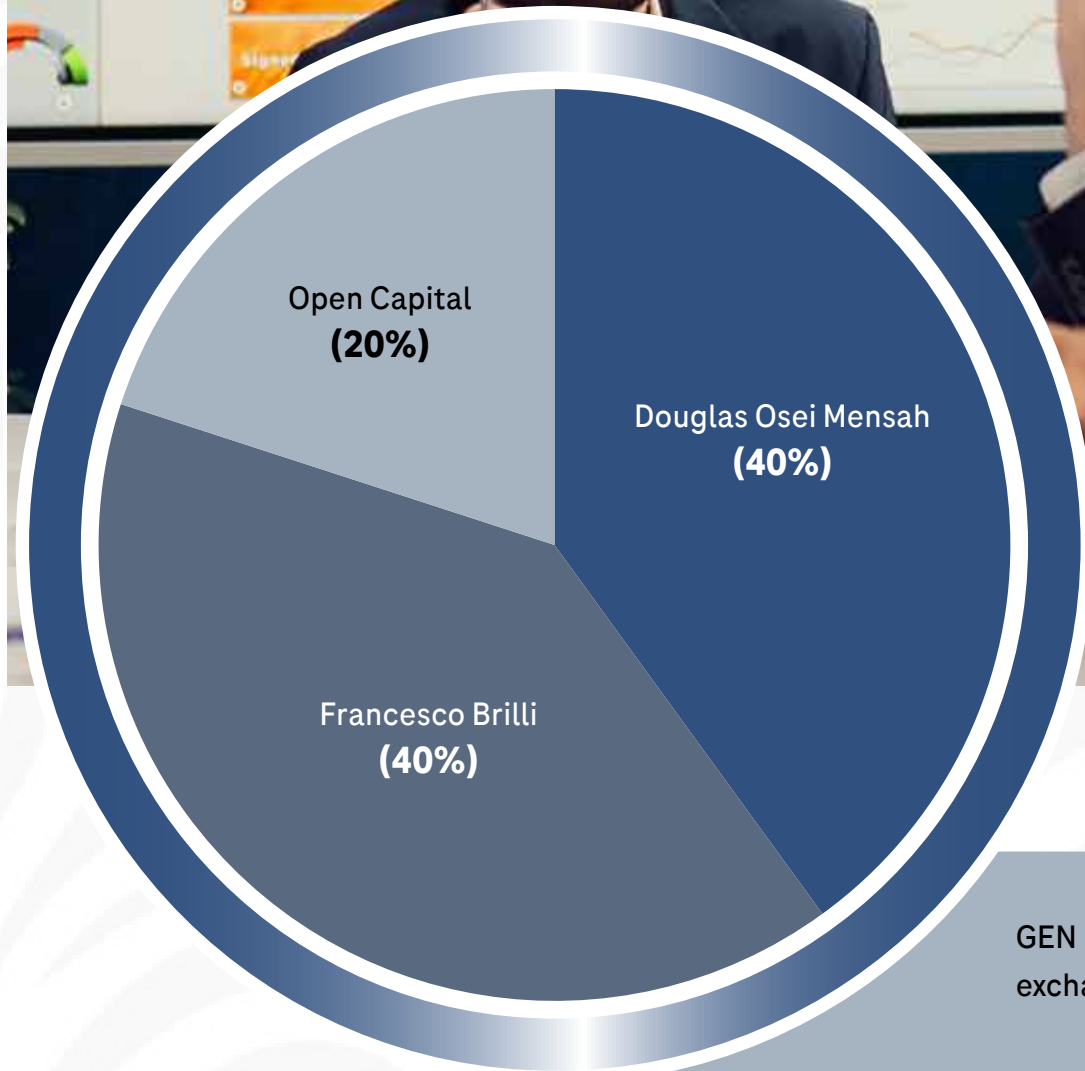

24/7 connection to internet will give to students access to facilities in the buildings for better integration. Through and innovative design and fast construction time, we are sure that Edge Hostel will be the most requested accommodation ever.

Our company specializes in providing domestic flight services within Ghana, significantly enhancing connectivity and mobility across the country.

Whether it is a business travel, tourism or personal trips, our reliable flights ensure efficient transportation for passengers. With a commitment to safety and convenience, we contribute to Ghana's economic growth and regional accessibility.
